<b>Location</b>	In Rasquera, Biosphere Reserve site, located between Terra Alta and The Priorat, with an altitude between 150 and the 200 meters, over calcareous soil.
<b>Alcohol content</b>	12,5 % vol.

#### Tasting notes:

<b>Visual analysis</b>	In view it shows a pale straw yellow color with gray pearl reflections. It gives off a fine and continuous bubble that ends up forming a delicate crown.
<b>Olfactory analysis</b>	It is fresh and alive. Floral aromas stand out, especially sweet flowers. In a second layer appear the notes of candied fruit with a memory of citrus, wrapped by pastry notes of aging.
<b>Gustatory analysis</b>	It enters freshly and at the same time it's dense and oily, well-balanced with right acidity. It travels around the mouth leaving a long taste.
<b>Temp. to serve</b>	Recommended temperature to serve is between 4°C and 6°C.
<b>Combination</b>	This wine is ideal to drink as an aperitif. It's an accompaniment to paella or pasta as well as the traditional white meats. It also combines with little sweet desserts.
